

American Retail Supply Assembly Instructions

Tempered Glass Cube Displays

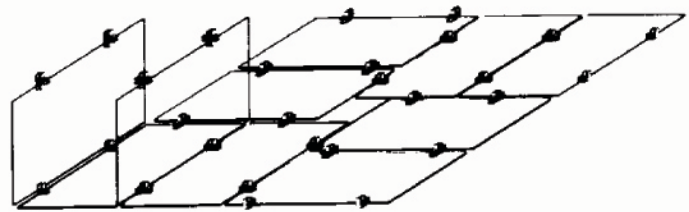

The following are general instructions to assemble your new Glass Cube Display. Please keep in mind that these are only general instructions. Your Unit may differ in specifics because Glass Cube displays may be set up in countless configurations.

Tools Needed - Wide Blade Screw Driver, Tape Measure or Ruler

1. Arrange the bottom Horizontal Lites (Pieces of Glass) on the base Surface.
2. Insert Connectors loosely 2- Inches from Edge of Glass. Glass connectors are designed to be used with "Tempered" Glass only. Lightly tighten screws in connectors. Align connectors, tighten firmly.
3. Place vertical lites in place, align, Tighten screws and continue as shown in drawings.
4. Add 1/2" per connector intersection to glass size for overall dimension.

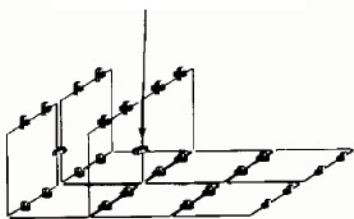

Single Sided Unit

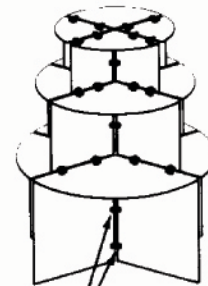

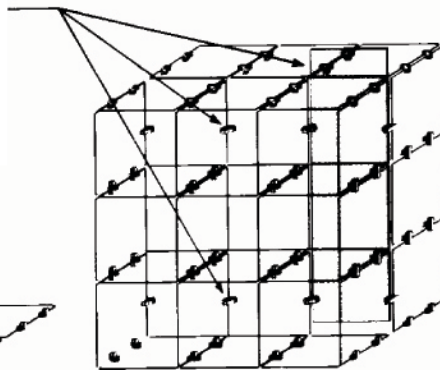

Compound Unit

NOTE:
Example of Double Sided Unit with vertical divider. Must be ordered separately. Connectors placed on top and bottom row only. Insert vertical divider last.

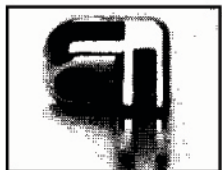

Double Sided Unit

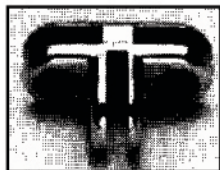

Note:
2 connectors holding bottom riser

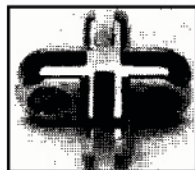

Tier Unit

2-Way Connector

3-Way Connector

4-Way Connector

Hinge

Hasp - Pair
